## LETTER OF TRANSMITTAL

---

SMITHSONIAN INSTITUTION,  
BUREAU OF AMERICAN ETHNOLOGY,  
*Washington, D. C., May 28, 1957.*

SIR: I have the honor to transmit herewith a manuscript entitled "Handbook of South American Indians, Volume 7, Index" and to recommend that it be published as the concluding part of Bulletin 143 of the Bureau of American Ethnology.

Very respectfully yours,

M. W. STIRLING, *Director.*

DR. LEONARD CARMICHAEL,  
*Secretary, Smithsonian Institution.*

## FOREWORD

With the publication of the index volume, the Handbook of South American Indians is complete. This detailed subject index includes tribal names and variants (in italic); the titles of papers listed under subjects, key words, and authors; and entries on animals and plants, geographical names, linguistics, ethnology, archeology, historical events and personages, and missions and religious orders. Information on climatic conditions is often given in geographical sections of the papers.

From the beginning it was realized that an index would be necessary to make easily available the vast amount of detailed material contained in the Handbook. The rather long delay in its appearance has been due to the fact that extra funds were not available after the publication of the scientific portion of the text, and the costs had to be met from the regular printing allotments of the Bureau of American Ethnology.

The vast synonymy of South American tribal names is such that it was completely impractical to attempt to include more than a skeleton outline in the tables of contents for the individual volumes. The same condition exists for the innumerable objects of material culture, and for names of places, plants, animals, and the like.

The compilation of an index for such a huge bulk of material requires both patience and skill of a high order. The difficulty increases in proportion to the bulk of the material. It would have been much simpler and less time consuming to have prepared an index for each volume as issued, but this would have caused a considerable delay in the appearance of the first six volumes.

Chief credit for the accomplishment of this truly big task goes to Mrs. Marguerite W. Poole and Mrs. Phyllis W. Prescott, of the Smithsonian's Editorial and Publications Division, to whom all users of the Handbook should be most grateful.

Mrs. Nancy Link Powars did considerable work on the index during the early stages of its preparation.

It would not be practical to mention the names of everyone on the Smithsonian Institution staff who cooperated in the total Handbook project. Credits have been given to many by the editor in the preceding volumes, but in this, the concluding issue, it seems fitting to mention again those who carried the heaviest burdens.

Foremost, of course, is Dr. Julian H. Steward, who, as scientific editor, was principally responsible for the format, organization, and assembly

of materials in the first six volumes. He personally assumed the huge task of reading and editing all the manuscript material submitted, as well as contributing large sections of his own.

Dr. Alfred Métraux, in addition to contributing more articles than any other author, acted for some time as assistant editor and gave freely of his advice and assistance to the editor and to other contributors.

Dr. Gordon R. Willey also acted in the capacity of assistant editor and assumed responsibility for the final assembly and preparation of the illustrations and manuscripts.

Miss M. Helen Palmer, editor of the Bureau of American Ethnology, had the tremendous task of performing the technical editing of the manuscripts, as well as reading proof, for the first six volumes of the Handbook. She also guided all the work through the press, conferring with the various authors in the course of publication. In many respects hers was the heaviest job on the entire project. Mrs. Eloise B. Edelen, who succeeded Miss Palmer as editor of the Bureau of American Ethnology, assisted in the editorial work on the first six volumes and was responsible for the editing of the present volume.

Mr. John E. Anglim arranged the illustrations for the entire Handbook and prepared or redrew the text figures.

Mrs. Ethelwyn Carter Pecora, secretary to Dr. Steward, not only helped with the many details of preparing the manuscript material but later performed the difficult task of checking the bibliography for the sections on linguistics.

Throughout the project Mr. Webster P. True and later Mr. Paul H. Oehser, who succeeded him as Chief of the Editorial Division, were frequently consulted and gave freely of their advice and experience.

It is with a feeling of satisfaction that we bring to conclusion what in many ways has been the most ambitious undertaking of the Bureau of American Ethnology.

MATTHEW W. STIRLING,  
*Director, Bureau of American Ethnology.*

*May 1957.*
